

Is Now Part of

ON Semiconductor®

To learn more about ON Semiconductor, please visit our website at
www.onsemi.com

Please note: As part of the Fairchild Semiconductor integration, some of the Fairchild orderable part numbers will need to change in order to meet ON Semiconductor's system requirements. Since the ON Semiconductor product management systems do not have the ability to manage part nomenclature that utilizes an underscore (_), the underscore (_) in the Fairchild part numbers will be changed to a dash (-). This document may contain device numbers with an underscore (_). Please check the ON Semiconductor website to verify the updated device numbers. The most current and up-to-date ordering information can be found at www.onsemi.com. Please email any questions regarding the system integration to Fairchild_questions@onsemi.com.

FAN54151

High Current Charging Switch with Protection

Features

- Integrated Back-to-Back Common Source N-channel MOSFETs with combined $R_{ON} = 17\text{ m}\Omega$
- Over-Voltage Input Protection to +20 V
- Hardware-based Safety and Protection for:
 - Input Over-Voltage Protection and Lockout
 - Input Under-Voltage Lockout
 - Fast and Slow Output Over-Voltage Protection
 - Over-Current Protection with Selectable Limits
 - Safe Operating Temperature
 - Charger Detach Protection
- True Reverse Current Blocking (TRCB)
- Fully Integrated I²C Slave with Configurable Address
- Configurable Host Interrupts

Applications

- High Current Battery Charging for:
 - Mobile Devices
 - Tablets

Description

The FAN54151 is a low loss, high current, I²C controlled switch.

Built in protection monitors the ICs input and output for over- and under-voltage as well as over- and under-current. The system protection is provided by controlling the gate voltages of a pair of N-channel MOSFETs to ensure that the output stays within a safe operating range. If a fault is detected, the FAN54151 will turn off the N-channel FETs and notify the host system via configurable interrupts.

Additionally, the FAN54151 includes an integrated temperature sensor and battery cell voltage monitor that provides additional protection.

The FAN54151 utilizes a 20-Bump, 0.5 mm pitch WLCSP package.

Figure 1. Typical Application

BOTTOM VIEW

NOTES:

- A. NO JEDEC REGISTRATION APPLIES.
- B. DIMENSIONS ARE IN MILLIMETERS.
- C. DIMENSIONS AND TOLERANCES PER ASME Y14.5M, 2009.
- D. SEATING PLANE IS DEFINED BY THE SPHERICAL CROWNS OF THE BALLS.
- E. PACKAGE NOMINAL HEIGHT IS 582 MICRONS ±43UM (539 - 625 MICRONS).
- F. FOR DIMENSIONS D,E,X,+Y SEE DATASHEET
- G. DRAWING FILENAME: MKT-UC020ABrev3.
